

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A magnetic head assembly comprising:  
a magnetic head;  
a rotational arm mounting the magnetic head;  
an arm side-wiring member, one end is electrically connected to the magnetic head and the other end has a first connecting portion, provided on the rotational arm; and  
an external side-wiring member, one end is able to electrically connected to an external circuit provided separately form the rotational arm and the other end has a second connecting portion,  
wherein the first connecting portion of the arm side-wiring member and the second connecting portion of the external side-wiring member are overlapped with a predetermined conductive adhesive member ~~having anisotropic conductivity~~ in between and electrically connected to each other on the rotational arm, the conductive adhesive member having anisotropic conductivity in a direction of overlapping of the first and second connecting portions.
2. (Original) A magnetic head assembly according to claim 1, wherein the arm side-wiring member comprises a wiring pattern made of a conductive material formed on the rotational arm and a relay board electrically connecting the wiring pattern and the external side-wiring member, wherein the relay board and the wiring pattern are overlapped with a predetermined conductive adhesive member having anisotropic conductivity in between and electrically connected to each other.
